Details we need from Genie Magnet

26 topics · 3 batches · management, HR, finance and operations

Genie Magnet OS

Information request: details we need from Genie Magnet

The demo and the Growth OS workflow already show how client work moves through the software. To build the remaining modules (management, HR, finance and operations) the way Genie Magnet actually works, we need your rules, formats and samples. This document lists each topic, what to write and what to attach.

Item	Detail
Prepared for	Genie Magnet — Janarthanan (Founder & Managing Director), Ashwin (Company Manager)
Prepared by	InTouch Global Tech
Date	30 September 2026
Version	1.1 — everything is customisable in the software; the first batch is optional
Topics	26 topics in 5 groups, sent back in 3 batches
Set-up session	Week of 9 November 2026 — your team sets up packages, team, roles and permissions, questions and invoice settings in the software
Related documents	Architecture and SaaS Plan (v1.3); Development Phases Plan (v1.1)

1. How to use this document

What changed in version 1.1

Genie Magnet OS will be fully customisable. Packages, team members, roles and permissions, onboarding questions and invoice settings are entered by your own team in the software — nothing is fixed by us.

So the first batch (S1–S5, F1 and O3) is now **optional**. Send it only if you would like us to pre-load your workspace before a guided half-day set-up session in the week of 9 November.

The later topics still matter: they tell us which rules the settings must support (for example PF and ESI, leave types, review agendas).

Genie Magnet OS is being built module by module. For each topic below we need a short document from Genie Magnet. It does not need to be polished: notes, bullet points and photos of forms are all fine.

Steps

1. Pick a topic from the list in section 2. Each topic has a code, such as **H4** for Payroll.
2. Write one short document for that topic and name it with the code and the topic, for example **H4 Payroll**. Word, Google Docs, Excel or PDF are all fine.
3. Answer the points under **Please describe**. Rough notes are fine; we will ask if anything is unclear.
4. Attach the items under **Please attach**: the sheets, forms and samples you use today. A real sample tells us more than a long description.
5. If a point does not apply, write **Not applicable**. If you have no fixed rule and want us to suggest one, write **Use your default**; we will propose a rule for your approval.
6. Send each topic as soon as it is ready. You do not need to wait until every topic is done.

What each topic shows

- **Suggested owner**: the person best placed to answer. Change it if someone else knows better.
- **Needed by**: the date we need it so the module can be built on time — or **Optional** where you can enter it yourselves in the software.
- **What we already know**: what you told us in the 140-question requirements. No need to repeat it; only correct it if something has changed.
- **Please describe** and **Please attach**: what to write and which files to send.

Private information

For payroll, employee and finance samples, you can hide names and amounts or replace them with dummy values. We need the structure and the rules, not real salaries.

Please share these files by email or a restricted Google Drive folder, not in a group chat.

Already covered — no document needed

Sales & CRM, agreements and packages, onboarding questionnaires, content (ideas, topics, scripts), shoots and production, editing and internal QC, revisions and change requests, publishing and social platforms, WhatsApp, the client portal, calendar, client reports, Genie Assistant and integrations. For these we only need your feedback on the demo; the starter data in section 3 is optional.

What happens next

We read each topic as it arrives and come back with any questions. Before a module is built, we show you its design or the updated demo screen for your approval.

2. Topics and dates

Topics are grouped by letter: **S** starter data and confirmations, **M** management, **H** HR and people, **F** finance, **O** operations and access. They come back in three batches; the first is optional because you can enter it yourselves in the software.

Batch	Send by	Why this date	Topics
1	Optional	Packages, team, roles, questions and invoice settings are entered by your team in the set-up session (week of 9 November). Send these only if you want them pre-loaded.	S1–S5, F1, O3
2	Fri 13 Nov 2026	Production is built from 16 November. Checklists and equipment can be entered in the software, but your lists help us test; the data to bring across (O2) is needed for go-live.	M4 (shoot, editing and QC checklists), O1, O2
3	Thu 31 Dec 2026	Management, HR and finance modules are built from 18 January 2027; your answers tell us which rules their settings must support.	M1–M6, H1–H7, F2–F5

All topics

Use the last column to track what you have sent.

Code	Topic	Suggested owner	Batch	Sent on
S1	Packages and prices	Janarthanan, Ashwin	1 · optional

3. Starter data and confirmations

Optional. Your team enters all of this yourselves in Genie Magnet OS during the set-up session in the week of 9 November. Send it only if you would like us to pre-load your workspace — rough lists are fine.

S1 · Packages and prices

Suggested owner: Janarthanan, Ashwin	Needed by: Optional · before Mon 9 Nov 2026	Used in: Agreements, monthly cycles, invoices, publishing quotas
---	--	---

What we already know

Packages are fully configurable. Each agreement sets the units, the revision allowance and the billing terms.

Please describe

1. Every package you sell today: name, monthly price and what is included (number of videos, posts, shoot days, platforms).
2. How many revisions are included per video, and what counts as an extra, billable change request.
3. Add-ons sold separately and their prices (extra video, extra shoot day, ads management and so on).
4. Contract length, advance payment and renewal terms.
5. Whether unused videos or posts carry forward to the next month, and for how long.

Please attach

- Your current price list or package brochure.
- One signed client agreement (you can hide the client's name).

S2 · Current clients and tracking sheet

Suggested owner: Ashwin	Needed by: Optional · before Mon 9 Nov 2026	Used in: Clients, production, testing with real data
--------------------------------	--	---

Please describe

1. Active clients: business name, contact person, phone or WhatsApp number, package, start date and the Genie Magnet person who owns the account.
2. For each client, who approves scripts and videos, and which WhatsApp group is used.
3. Clients that are paused, ending soon or on a trial.
4. Your video code format. The demo uses client code, month and number, for example KVR-0926-05. Is that right?

Please attach

- The current video tracking sheet (Excel or Google Sheet).
- Any client master list you keep.

S3 · Team list, roles and skills

Suggested owner: Ashwin, HR	Needed by: Optional · before Mon 9 Nov 2026	Used in: User accounts, work allocation, capacity
------------------------------------	--	--

What we already know

The demo has these roles: Founder/MD, Manager, Editor, Finance, HR and Client. Topic O3 covers what each role may see and approve.

Please describe

1. Everyone who will use the software: name, role, department, reporting manager, email and phone.
2. Freelancers and part-time people, and the work they do.
3. Each person's skills (shooting, editing, scripting, design, ads, sales and so on).
4. Working days and hours for each person, if they differ.

Please attach

- Your current team list or organisation chart.

S4 · Onboarding question corrections

Suggested owner: Janarthanan	Needed by: Optional · before Mon 9 Nov 2026	Used in: Client and agency onboarding questionnaires
-------------------------------------	--	---

What we already know

The draft question bank is Appendix C of the Architecture and SaaS Plan (v1.3). Only the essential questions must be answered before work starts; the rest are “complete within 7 days”, with Genie Assistant reminders.

Please describe

1. Questions to remove, change or add in the client questionnaire.
2. Questions to remove, change or add in the agency questionnaire.
3. Which questions must be answered before work starts, and which can wait up to 7 days.

Please attach

- Appendix C with your changes marked (tracked changes or comments are fine).
- Any onboarding form or discovery sheet you use with clients today.

S5 · How clients fill the questionnaire

Suggested owner: Janarthanan, Ashwin	Needed by: Optional · before Mon 9 Nov 2026	Used in: Client onboarding, client portal
---	--	--

Please describe

1. Should the client fill the questionnaire alone through a link sent on WhatsApp, should the account manager fill it with them on a call, or both?
2. Who at Genie Magnet checks the answers and marks onboarding as complete?
3. Do clients need the questionnaire in Tamil as well as English?

4. Management

The Growth OS frameworks give us the structure. Agendas, checklists and scoring are editable in the software; these topics tell us how Genie Magnet runs them, so the settings support your way of working and start with sensible defaults.

M1 · STOP reviews (daily, 7-day, 14-day and 45-day)

Suggested owner: Janarthanan	Needed by: Thu 31 Dec 2026	Used in: Reviews & meetings, decisions & commitments
-------------------------------------	-----------------------------------	---

What we already know

Operational review daily (10–15 minutes), tactical reviews weekly and every 14 days (about 2 hours), strategic review every 45 days (full day, mandatory). Decisions become commitments with an owner and due date; overdue ones return to the next review. The facilitator locks the meeting record.

Please describe

1. For each review type: the agenda in order, with rough time for each item.
2. Who attends and who runs each review.
3. The figures to show on screen (for example revenue against target, videos delivered, overdue work, client risks).
4. What must be written down: decisions, commitments, breakdowns and breakthroughs, scores.
5. The usual day and time, and what happens when a review is missed.

Please attach

- Agendas or notes from the last two or three reviews of each type.
- Your STOP sheet, if you use a changed version of the consulting workbook.

M2 · Goals and revenue cascade

Suggested owner: Janarthanan	Needed by: Thu 31 Dec 2026	Used in: Goals, revenue cascade, dashboards
-------------------------------------	-----------------------------------	--

What we already know

Goals exist at company, department, team and individual level, and can be financial, functional, learning or operational. You approve company goals. Revenue breaks down into sales, deals, average value, leads, conversion and delivery capacity; new sales, renewals and lost clients are counted separately.

Please describe

1. Revenue target for this financial year and the next, by month if you have it.
2. How the target splits: new clients against renewals, and by service (video, social media, branding, consulting and so on).
3. Your working numbers: average client value, leads per month, lead-to-client conversion, and videos one editor can finish in a month.
4. Department and individual goals you set today, and how often they are checked.

Please attach

- Your Business Aspiration (BA) sheet, or any target sheet you use.

M3 · Round Table (team feedback)

Suggested owner: Janarthanan, HR	Needed by: Thu 31 Dec 2026	Used in: Round Table, performance
---	-----------------------------------	--

What we already know

Feedback uses set questions and controlled visibility. The demo shows a 45-day team circle with timed rounds and anonymous results. The anonymity and release rules are still to be confirmed.

Please describe

1. How it runs today: who gives feedback to whom, the rounds and the questions asked.
2. Anonymous or named? Who sees the results, and when?
3. Can employees reply to feedback? What follows from it (training, recognition, new goals)?

Please attach

- Your current format or question sheet.

M4 · SOPs and checklists (PSS, KRA)

Suggested owner: Ashwin, production lead	Needed by: Fri 13 Nov 2026 for shoot, editing and QC checklists; Thu 31 Dec 2026 for the rest	Used in: SOPs & checklists, Internal QC, shoots
---	--	--

What we already know

SOPs cover shooting, editing, client onboarding, delivery, sales, HR, assets, finance and recurring work. Each SOP has an owner, a reviewer, a version and the roles it applies to.

Please describe

1. The SOPs you have today, and who owns each one.
2. For each checklist: the steps, who does it, who checks it and who approves it.
3. Which steps need proof (a photo, a file or a link).
4. Your PSS (Process, System, Structure) sheet and the KRAs linked to each process, if already written.

Please attach

- Existing SOP documents.
- Checklists: shoot kit, editing, internal QC and publishing.
- PSS and KRA sheets.

M5 · Client Fitment Map and health score

Suggested owner: Janarthanan	Needed by: Thu 31 Dec 2026	Used in: Client health, dashboards, Genie Assistant alerts
-------------------------------------	-----------------------------------	---

What we already know

The four quadrants are Amazing (low effort, high return), Bread-winning (high effort, high return), Convenience (low effort, low return) and Dangerous (high effort, low return).

Please describe

1. How you judge a client's "effort" (revisions, late approvals, calls, shoot days) and "return" (fee, margin, referrals, brand value).
2. Warning signs that a client is at risk (late approvals, late payment, falling results and so on).
3. How often each client should be re-scored, and what action follows for each quadrant.

Please attach

- Any client grading sheet you use, or three or four example clients with the quadrant you would place them in.

M6 · Business diagnostic and scenario planner

Suggested owner: Janarthanan	Needed by: Thu 31 Dec 2026	Used in: Business diagnostic, scenario planner
-------------------------------------	-----------------------------------	---

What we already know

In version 1 the diagnostic is for Genie Magnet's own management. Scenarios compare more clients, price changes, volume, outsourcing, hiring, equipment and capacity without changing actual figures. The founder-dependency weighting is still to be confirmed.

Please describe

1. Use the Growth OS Business Functional Assessment (7 functions) as it is, or with your changes?
2. Founder dependency: which decisions and approvals only you make today, and which you want to hand over.
3. The three to five "what if" questions you ask most often, for example "If I add 5 clients, how many editors do I need?"

Please attach

- Your BFA sheet with scores, if done, and any planning sheet you use. Or write "Use the Growth OS default".

5. HR and people

Leave types, salary components, KRAs and similar rules are settings you control. These topics tell us which rules the settings must support. Real forms and sheets help most; for salary and personal details, hide the names and amounts or use dummy values.

H1 · Employee records, joining and exit

Suggested owner: HR	Needed by: Thu 31 Dec 2026	Used in: Team & HR, access, assets
----------------------------	-----------------------------------	---

What we already know

Records hold role, department, manager, contact details, skills, documents, onboarding, attendance, leave, training, performance and equipment held. Joining creates access, equipment, calendar and training tasks. Exit reassigns work, removes access and requires equipment return.

Please describe

1. The details you keep for each employee and freelancer, and which are private (for example ID proofs and bank details).
2. Documents collected at joining.
3. Joining checklist: the steps, who does each one and by when.
4. Probation: how long it is, how it is reviewed and who confirms it.
5. Exit checklist: notice period, handover, equipment return and full-and-final settlement.

Please attach

- Joining form.
- Offer or appointment letter template.
- Joining and exit checklists.

H2 · Recruitment

Suggested owner: HR, Janarthanan	Needed by: Thu 31 Dec 2026	Used in: Recruitment
---	-----------------------------------	-----------------------------

What we already know

Stages: candidate, screening, interview, scorecard, approval, offer, then joined or rejected. We have the hiring template you shared. The interview scorecard is still to be confirmed.

Please describe

1. Interview rounds for each role, and who takes each round.
2. The interview scorecard: what is scored, the rating scale and the pass mark.
3. Who approves a hire and the salary offer.
4. Where candidates come from (job sites, referrals, social media).

Please attach

- Interview scorecard.
- Offer letter template.
- One filled role task document.

H3 · Attendance and leave

Suggested owner: HR	Needed by: Thu 31 Dec 2026	Used in: Attendance & leave, planning, payroll
----------------------------	-----------------------------------	---

What we already know

Attendance comes from the Hikvision biometric software and Excel. Leave types and approvals are configurable. Leave is checked against shoots, locked meetings and minimum staffing.

Please describe

1. Working days, office timings and shifts; grace time; what counts as late, half day and absent.
2. How work-from-home and on-location shoot days are marked.
3. Leave types (casual, sick, earned and so on), yearly balance, carry-forward and encashment.
4. Who approves leave, and who may approve leave that clashes with a shoot or a mandatory meeting.
5. Holiday list for the year.

Please attach

- A sample Hikvision export for one month (names can be hidden).
- Your current attendance Excel sheet.
- Leave policy and the 2027 holiday list.

H4 · Payroll

Suggested owner: HR, Accounts	Needed by: Thu 31 Dec 2026	Used in: Payroll, payslips, true costing
--------------------------------------	-----------------------------------	---

What we already know

Full salary calculation, payroll and payslips are needed. The statutory and tax setup is still to be confirmed.

Please describe

1. Salary structure: the components (basic, HRA, allowances and so on) and how each is calculated.
2. Deductions: PF, ESI, professional tax and TDS, and who each applies to.
3. Loss of pay: how absent days and late marks reduce salary.
4. Incentives, bonus and overtime: the rules and who approves them.
5. Salary advances and loans: how they are recovered.
6. Pay date, payroll cut-off date, and who approves the payroll before salaries are paid.
7. How salaries and freelancer payments are made (bank transfer, bulk upload file, which bank).

Please attach

- A sample payslip.
- Your current salary sheet, with amounts hidden or replaced by dummy values.
- Your bank's bulk payment file format, if you use one.

H5 · Performance, KRA and incentives

Suggested owner: Janarthanan, HR	Needed by: Thu 31 Dec 2026	Used in: Performance & KRA, leaderboard, payroll
---	-----------------------------------	---

What we already know

Every role has a KRA/KPI scorecard (outcome, quality, timeliness, ownership, client impact, learning, team contribution). Weights and the appraisal formula follow the PACE appraisal model. Scores are adjusted for approved leave and client delays, and employees can appeal. Incentives need approval and a set budget.

Please describe

1. KRAs and KPIs for each role, with targets and weights.
2. The PACE appraisal formula and rating scale, and how A and B players are decided.
3. The review period (monthly, quarterly or yearly) and who gives the scores.
4. Incentive and reward rules: who is eligible, the amounts or percentages, and whether they are paid through payroll.
5. Who may see the leaderboard.

Please attach

- KRA sheet for each role.
- Appraisal form.
- Incentive policy.

H6 · Learning

Suggested owner: HR	Needed by: Thu 31 Dec 2026	Used in: Learning, skill matrix
----------------------------	-----------------------------------	--

What we already know

The software links to Genie Magnet's own LMS or community. Training paths are set per role and assigned at joining or promotion, and completion updates the skill matrix.

Please describe

1. The name and link of your LMS or community platform, and who runs it (in-house or a vendor).
2. Can the platform share course completion data? If you are not sure, tell us who we can ask.
3. Courses or training for each role, in order.
4. How completion is checked: certificate, test or manager sign-off.
5. The skills and levels in your skill matrix.

Please attach

- Course list for each role.
- Skill matrix.

H7 · Daily data sheet and time tracking

Suggested owner: Ashwin, HR	Needed by: Thu 31 Dec 2026	Used in: Daily data sheet, time tracking, true costing
------------------------------------	-----------------------------------	---

What we already know

Time is recorded against a project, video or task, as production, meeting, revision, travel, training, client waiting or internal work. The demo's Daily Data Sheet has manager and HR sign-off.

Please describe

1. The fields in your current daily data sheet, and whether the demo screen matches them.
2. When it must be filled (end of each day?) and what happens if it is missed.
3. Who signs it off, and by when.
4. Should time be typed in by hand, recorded with a start/stop timer, or both?

Please attach

- Your current daily sheet, filled for one week.

6. Finance

Billing (F1) is optional: GST details, invoice numbering and payment terms are entered in the invoice settings. The other finance topics tell us which rules the settings must support; they are needed by the end of December.

F1 · Billing, GST and collections

Suggested owner: Accounts, Janarthanan	Needed by: Optional · before Mon 9 Nov 2026	Used in: Invoices, payment links, collections, client portal
---	--	---

What we already know

Billing can be a monthly retainer, milestones or one-time. Credit notes and payment terms are needed. Advances, part payments, overdue amounts, refunds and write-offs are tracked separately. Currency is INR. Contracted, invoiced, earned and collected revenue are kept apart.

Please describe

1. GST: GSTIN, registered state, GST rate on each service and SAC codes. Do you bill clients in other states?
2. Invoice number format, and the financial year you use (April to March?).
3. When invoices are raised: in advance at the start of the month, after delivery, or by milestone.
4. Payment terms and follow-up: days to pay, when reminders go out and who follows up.
5. How clients pay: UPI, bank transfer, payment link, cash or cheque.
6. Who approves invoices, discounts, credit notes and write-offs.
7. Your accounting software (Tally, Zoho Books or none), and whether data must be sent to it.

Please attach

- Two sample invoices: one retainer and one one-time.
- A sample receipt or credit note, if you use them.
- Your current outstanding or collections sheet.

F2 · Expenses and vendors

Suggested owner: Accounts	Needed by: Thu 31 Dec 2026	Used in: Expenses & vendors, true costing
----------------------------------	-----------------------------------	--

What we already know

Each expense records the amount, category, receipt, requester, approver, client or project and payment status.

Please describe

1. Expense categories (travel, food on shoots, props, software, rent, electricity and so on).
2. Approval limits: who can approve up to what amount.
3. Petty cash: how it is given out and settled.
4. Vendors and freelancers you pay regularly, and how their bills reach you.
5. Which expenses are charged back to clients.

Please attach

- Current expense sheet or register.
- Vendor list.
- A sample vendor bill.

F3 • True costing

Suggested owner: Janarthanan, Accounts	Needed by: Thu 31 Dec 2026	Used in: True costing, profitability, scenario planner
---	-----------------------------------	---

What we already know

Hourly cost = employer cost ÷ productive hours. Direct costs go to the video or project; shared costs (management, HR, rent, software, utilities, administration) are split through cost pools without double counting. Equipment is depreciated on purchase value, useful life and residual value (your example: a ₹2,00,000 camera over 1 year) and charged by hours used. Free rework counts as cost. Closed months are not recalculated.

Please describe

1. Productive hours per person per month, after meetings, breaks and training.
2. Monthly overheads: rent, electricity, internet, software subscriptions, admin salaries and any others.
3. How shared costs should be split: by hours worked, by number of videos, or by client revenue.
4. Your definitions of contribution and operating profit, with one worked example from a real client or video.

Please attach

- Any costing sheet you use.
- One month of overhead figures (rounded amounts are fine).

F4 • Financial reports

Suggested owner: Janarthanan, Accounts	Needed by: Thu 31 Dec 2026	Used in: Financial reports, dashboards
---	-----------------------------------	---

What we already know

Reports include budget against actual, cash flow, amounts to receive and to pay, profitability and how overdue payments are. Reports work by financial month and custom periods, and closed months can be locked.

Please describe

1. The reports you look at today, how often, and the figures that matter most.
2. Do you set a yearly or monthly budget by category?
3. Who may see which report (for example, the manager sees client profitability but not salaries).

Please attach

- Sample reports you use today (profit and loss, cash-flow sheet, outstanding list).

F5 · Financial Planner (Way To Fortune)

Suggested owner: Janarthanan	Needed by: Thu 31 Dec 2026	Used in: Financial Planner (Genie Magnet only)
-------------------------------------	-----------------------------------	---

What we already know

We have the Way To Fortune planner sheet you shared. It stays private to Genie Magnet and is not part of the SaaS plans. Personal-finance access is kept separate from company finance.

Please describe

1. Is the shared sheet the final version? List any changes.
2. Who uses it: only you, or employees too for their own finances?
3. Who may see whose data? We plan that each person sees only their own.

Please attach

- The latest version of the sheet, if it has changed.

7. Operations and access

Roles and permissions (O3) are optional — you set them in the permission matrix during the set-up session. The equipment list and the data to bring across are needed in November.

O1 · Equipment and assets

Suggested owner: Production lead, Ashwin	Needed by: Fri 13 Nov 2026	Used in: Equipment & assets, shoot kit checklists, true costing
---	-----------------------------------	--

What we already know

Cameras, lenses, lights, audio, tripods, batteries, chargers, memory cards, laptops, drives and office equipment are tracked; QR labels are not needed on every item. Equipment is booked by project, date and time. Checkout records condition, charge, accessories, who took it, who checked it and when it is due back. Maintenance and warranty are tracked.

Please describe

1. Who approves equipment bookings and settles clashes.
2. The kit list for a single-camera shoot and for a dual-camera shoot.
3. The useful life to use for each type of equipment (for costing).
4. What happens when equipment is damaged or lost.

Please attach

- Full equipment list with purchase date, purchase value, serial number (if any) and current condition.
- Your current kit checklist.

O2 · Data to bring into the new software

Suggested owner: Ashwin, Accounts	Needed by: Fri 13 Nov 2026	Used in: Data migration, go-live
--	-----------------------------------	---

What we already know

Active clients, projects, employees, equipment, relevant financial records, SOPs and files should come across. The amounts, date ranges and who cleans the data are still to be confirmed.

Please describe

1. What to bring in, and from how far back (for example, invoices from 1 April 2026).
2. Where each set of data is today (Excel, Google Sheets, Drive or another software).
3. Who at Genie Magnet will clean and check the data before it is imported.
4. Rough counts: clients, videos, employees, equipment items and invoices.

Please attach

- Links to the source sheets or folders (view access is enough).

O3 · Roles and permissions

Suggested owner: Janarthanan	Needed by: Optional · before Mon 9 Nov 2026	Used in: Sign-in, every module, audit log
-------------------------------------	--	--

What we already know

Salary, HR and personal-finance data are restricted by role. Clients never see internal costs, salaries or notes. You are the final approver. Changes to finance, HR, salary, permissions and pricing keep an audit history.

Please describe

1. The roles you need (for example Founder/MD, Manager, Editor, Videographer, Scriptwriter, Sales, HR, Accounts, Freelancer).
2. For each role: what they can see, change and approve. The table below may be the easiest way to answer.
3. Approvals that must come to you personally, and those Ashwin or others can give (with any amount limits).
4. Who can approve on someone's behalf when they are on leave, and for how long.

Fill each box with **V** (view), **E** (edit), **A** (approve) or **–** (no access). Add or rename roles as needed.
